

8 Subquery \Rightarrow Subquery is a SELECT
9 statement nested with another
SQL statement.

10 It is essentially a query
11 within a query.

12 Note:- Use chat gpt for table.

1 Q: Find employees whose salary is greater
than the average salary.

2 Ans \Rightarrow SELECT EmployeeID, Name, Salary
3 FROM Employees
WHERE Salary > (SELECT avg(salary)
4 FROM Employees);

5 Note:- (Under the bracket called "Subquery")

6 I am trying to make consistency
So, for (1-10 day) I will write
Some basic then we will solve
Real @ interview Question. (But whatever
I am sharing is also imp)
